<td>STG 02/STG 03: Oil and Gas Coating Technology Symposium</td>
</tr>
<tr>
<td>6970 Development Of Spray-Applied Pipeline Erosion-Protective Epoxy Lining</td>
</tr>
<tr>
<td>6971 High Temperature FBE Coating Disbondment in Multi-Layer PP Insulation Coatings</td>
</tr>
<tr>
<td>6972 Coating Deterioration- A Mechanistic Overview</td>
</tr>
<tr>
<td>6973 The Importance and Growth of Technical Apps In Corrosion Risk Assessment, Corrosion Inspection/Engin</td>
</tr>
<tr>
<td>6974 Corrosion Risk Assessment and Cathodic Protection for Aging Electric Utility Transmission Structures</td>
</tr>
<tr>
<td>6975 Effect of TSA Coating Damage on the Mechanism of Calcareous Deposit Formation in Boiling Seawater</td>
</tr>
<tr>
<td>6976 Corrosion Management Implementation in Large Oil and Gas Projects</td>
</tr>
<tr>
<td>6977 Corrosion Control of a Hydrocracking Unit Debutanizer Overhead System</td>
</tr>
<tr>
<td>6978 Corrosion Management Challenges Related to CO2 Enhanced Oil Recovery on Existing Production Infrastructure</td>
</tr>
<tr>
<td>6979 Sulfur Recovery Plant; Corrosion Controls</td>
</tr>
<tr>
<td>6980 Management of Integrity Operating Window (IOW) for an Aging Gas Processing Plant</td>
</tr>
<tr>
<td>6981 Effective Implementation of Asset Integrity Management Systems with Visualisation Tools</td>
</tr>
<tr>
<td>6982 The Role of Corrosion Management in Prevention of Corrosion Failures</td>
</tr>
<tr>
<td>6983 Risk Assessment And Downhole Chemical Treatment Program For Production Wells Within The Wafra Field</td>
</tr>
<tr>
<td>6984 The Importance of Growth of Technical Apps In Corrosion Risk Assessment, Corrosion Inspection/Engin</td>
</tr>
<tr>
<td>6985 Development of a New High Charge Polymer for Cooling Water Treatment</td>
</tr>
<tr>
<td>6986 The Chemistry and Performance Characteristics of Boiler Water Treatment Polymers</td>
</tr>
<tr>
<td>6987 The Chemistry and Performance Characteristics of Boiler Water Treatment Polymers</td>
</tr>
<tr>
<td>6988 Calcium Carbonate Scale Formation and Prevention in Aqueous Solutions and Mixed Solvents</td>
</tr>
<tr>
<td>6989 Removal Of Cu(Ii) From Aqueous Solution With Precipitated Calcium Carbonate</td>
</tr>
<tr>
<td>6990 Controlling of Calcium Oxalate Crystallization by Using Crosslinked Polymers</td>
</tr>
<tr>

7186 Corrosion Control On-Grade Petroleum Products Storage Tank Bottoms Using Impressed Current Cathodic Protection System with Continuous Anode Bed

7303 Optimization Cathodic Protection Design for Offshore Platform: Solution for the Contraction of Big

7430 External Corrosion Control of Submarine Pipelines

7453 The Influence of Sacrificial CP System on the Corrosion Behavior of Offshore Structures

7462 Upgrading Methods of Cathodic Protection System for Aboveground Storage Tanks

7484 Case Study of an ICCP Design and Installation for Welded Casings Using Boundary Elements Software

7615 Platform Cathodic Protection with Anodes Racks and Subsea Current Measurement

7641 Comparison of New ICDA Methodology to Buried Pipeline: Numerical Modeling and Continuous P/S Potential Monitoring

STG 32: Advances in Materials for Oil and Gas Production

6981 HISC Resistance and Improvement Methods For Duplex and Super Duplex Stainless Steels

7171 Marine Seawater Infection Fabric Metalurgy for Deepwater Projects

7199 Sour Service Performance of EPR - 110ksa Grade Material

7126 Qualification of Super 13Cr-110 in HPHT Sour Well Service with Concentrated Brines

7155 Effect of Sidc Upgrading Root Configuration on Edge Fracture on DBC Test

7171 The Effect of Medium Density Clear Brine Pumps upon the Environmental Cracking Behavior of High Strength Alloy UNS S42028

7196 Crevice Corrosion Performance of High Grade Stainless Steels and Ni-Based Alloys in Natural And Treated Sewer

7203 The Effect of Notch Configuration on NACE TM0177 DBC Elastic Compliance and Recommendations for Future Use

7204 Evaluation of Full Size C110 Premium Casings Connections Fit-for-Purpose Performance in Mildly Sour Environment

7258 Corrosion Kinetics of Carbon Steels in High Density ZnCl2

7232 Comparing Environmental Resistance of UNS R55400 Tubulars to Other Titanium Alloys

7333 Comparison of Corrosion Behavior in HIC. Test Solutions for FFP evaluation

7386 UNS N09955 Corrosion Cracking Resistance

7382 Updated Application Limits for 13Cr Super Martensite Steel Bar-stock Materials

7474 Electrochemical Analyses of 15%Cr and 17%Cr Martensite-Based Stainless Steel OCTG Materials with a Possible Range of Austenite Ratio

7475 A New Cast Ni-Base Alloy suitable for Severe Sour Service

7498 Hydrogen Induced Cracking of A316 Plate Steels and the Apparent Effect of Microscopic Banding

7613 Effect of Stress Level on the SCC Behavior of 13Cr Steel during HT Exposure to Formic Brines

7631 Unexpected Sour Cracking Resistance of Duplex and Superduplex Steels

8031 Evaluation of Test Techniques for Determining Susceptibility Nickel Based Alloys to Hydrogen Assisted Cracking in Seawater with CP Conditions

7847 Evaluation of Susceptibility to Hydrogen Embrittlement of High Strength Corrosion Resistant

7861 Slow Strain Rate and Rising Step Load Hydrogen Embrittlement Testing of UNS N07718 - STG 32

7246 Fusion Bonded Epoxy Coatings (FBE) and Dishbondment

7307 Impact of Biocomponents in the Fuel and Heating Oil on the Compatibility of Sealing Materials

7310 Development of Healing Coatings using Encapsulated Lignin Based Oil and Tung Oil as Healing Agents

7322 Study of protection mechanism of multifunctional coating systems against internal corrosion in pipelines in oil and gas industry

7345 New Advances in Epoxy Protective Coatings

7356 Toward the Development of an Inspection Tool for Corrosion Under Insulation

7423 Expected Service Life and Cost Considerations for Maintenance and New Construction Protective Coating Work

7448 Influence of Deposition Parameters on Corrosion Protection Properties of Electrophoretic Acrylic Paints

7465 Strategies to Control Corrosion Under Insulation

7539 Residual Soluble Salts and Coating Performance – Separating Myth from Reality

STG 35: Direct Assessment

7055 Are You Trained, Certified, and Qualified to Assess Corrosion and Related Defects?

7056 Remaining Strength Of Corroded Pipe Direct Assessment Process

7038 MP-DA Analysis On Block 12 And Block 15 Gathering Pipelines On Petroamazonas EP

7091 Improvement to Cathodic Protection Performance using DCVG Prioritization

7092 Internal Corrosion Direct Assessment For offshore Pipelines

7036 New and Old Challenges in Analyzing EDA Indirect Inspections Data

7662 Managing Uncertainty when Assessing External Corrosion of a Buried Oil Pipeline Segment

7672 Application of 3D Metrology Technology in Inspection, corrosion mapping and failure analysis

7719 Corrosiveness of Environmental Onshelves Pipelines on Buried Onshore Pipelines: A Bayesian Network Approach

7823 Corrosion Control for the pulp, Papermaking, and Biomass Conversion Industries.

7038 Corrosion of Metals in Treated Wood Examined by Synchrotron Based Xanes and XFM

7278 Molecular Microbiological Methods to Investigate Microbial Influenced Corrosion in Fully Integrated

7279 Development of Theoretical Production, Processing, and Utilization of Bio-Oil

STG 39: Recent Experiences with Nickel, titanium, Zirconium, and Other Corrosion Resistant Alloys

7174 Utilizing Nickel Alloy metal coating as an alternative to PWHT

7363 Suitability of High Alloxed Materials in Molten Salts at 600 °C

7364 Improved Version of UNS N08825 with Higher Corrosion Resistance

7493 Materials in Municipal Waste and Biomass-Fired Power Generation - a Review of Recent Experience

7563 UNS N08311 and UNS N08811 Plus, multi purpose alloys for chemical industry and related applications

7631 Corrosion Study of Welds and Heat-Affected Zones of Wrought Nickel-Based Alloys

7754 10 Years of Field Testing Experience with Weld Overlay Materials in Coal-Fired Boilers

7841 Corrosion Rate Measurement Using Electrochemical Technique

7854 STG 39 - Increase of corrosion resistance by anodic oxidation

7858 Marine Corrosion

7058 Galvanic Series in Seawater as a Function of Temperature, Oxygen Content, and Chlorination

7265 Corrosion Behavior of Cr and Cu Containing Low Alloys Steels in Solution

7377 The Effect Of Alloy UNS 92525 Microstructure On Its Cavitation Erosion Behavior In Seawater

425 Development of Corrosion Resistant Steel for Coal Carrier Cargo Hold

451 The Effect of a Magnetic Field on the Galvanic Corrosion of Ni-Al Bronze in Natural Seawater

471 In-situ fatigue crack growth rates of carbon steel in air and seawater using image correlation

4716 Embedded Monitoring System for Determination of Aluminum Alloy Sensitization

7561 Effects of Dissolved Oxygen and Temperature on the Corrosion Properties of B206 and A356 Aluminum Alloys Exposed to Seawater

7630 Effect of Iron Content on Localized Corrosion Resistance of Ni-Cr-Mo Alloy Weld Overlays in Chloride

7785 Monitoring and Inspection Options for Evaluating Corrosion in Offshore Wind Foundations

7789 Mixtures Of Acid And Natural Substances With Low Environmental Impact In The Production Of Anodized

7797 Interference between sacrificial CP systems

7845 Adequate CP Design Can Prevent Costly Premature Failure of Seachest Waster-Sleeves of Marine Vessels

STG 61: Top-of-Line Corrosion

7274 Inhibition Mechanisms for CO2 Corrosion Mitigation by Amines at the Top-of-the-Line

7275 Top of Line Corrosion Testing for a Gas Field with Acetic Acid and Low CO2

7664 Study of the localized nature of line of the top of line in sweet environment

7691 Localized 13Cr Corrosion In Maritime Sour Environments

7891 Effect of Monoethylene Glycol on Sweet Top-of-Line Corrosion

TEG 043X: Electrochemical Corrosion Control of Steel in Concrete
Corrosion Induced Bridge Tendon Failures Resulting from Deficient Grout: Part I – Model Development
Corrosion of Concrete in High Temperature Environments
Corrosion Protection of Concrete Gauzes and Deck of a Ship Repair Yard
Development of Integrated Condition Monitoring System for Corrosion and Stray Current Monitoring On Offshore Platforms
Optimizing Current Distribution in Reinforced Concrete Cathodic Protection Systems
Characterization of Concrete and Corrosion of Steel Fibers Embedded in Dry-Cast Concrete Pipe
Anodic Behavior of Steel in Enhanced Sulfate Solutions
Modeling and Control of Localized Corrosion of Steel in Submerged Reinforced Concrete Structures
Feasibility of Cathodic Protection in Grooved Post Tensioning Tendons
Next Generation Discrete Galvanic Anodes for TEG 043x

TEG 184X: Oil and Gas Corrosion Inhibitors for Harsh Environments and Industrial Applications of High Temperature Corrosion Inhibitors
Application of Low Cr Steels in the Presence of Corrosion Inhibitors
A Parametric Study of Corrosion Inhibitor Partitioning in Oil and Water Phases
Frosterion-Corrosion of Low Carbon Steel in Oil-Brine-Sand Flow
Internal Stabilization and Inhibition Effectiveness of Corrosion Inhibitors at High Temperatures
The Development of Sulfur Solvent/Corrosion Inhibitor Product for Extremely Aggressive Sour Environments
Development of Novel Inhibitor Chemistries to Protect Metal Surfaces from Saturated Completion Fluids
Further Studies on Phosphate Based Inhibitors Effective for Oxygen Corrosion

TEG 092X: Underdeposit Corrosion
Investigation of Under Deposit Corrosion (UDC) in Halfdan Production Tubulars
Failure Analysis and Investigation Methods of Boiler Tubes Corrosion/Case Study
Effect of Iron Sulfide Deposits on Sour Corrosion of Carbon Steel
Assessment of Underdeposit Corrosion and Mitigation Using Chemicals
A Comparison of Mono- to Di- PE Ratio in Inhibitor Formulations in the Mitigation of UDC
Improving the Controlled Humidity Protection Systems by Addition of Vapor Phase Corrosion Inhibitors
Detecting Inhibitor Migration Depth in Topically-Treated Concrete Using DART-MS
Improved Packaging Film Incorporating Vapor Phase Corrosion Inhibitor and High Recycle Content
Corrosion Protection Products and Inhibitor Films Contributions to Total Protective Effect
Corrosion Abatement in Acid Pickling Industries by Effective N-Heterocyclic Compounds
Corrosion Behavior in Saline Solution of Pulsed Electrodeposited Nanocomposite Zn-Ni-CeO2 Coatings
Vapor Phase Corrosion Inhibitors in Functional Fluids

TEG 108X: Hydrogen Permeation
Effect of Electrode Spacing of a Coupled Multielectrode Array Sensor on Corrosion Rate Monitoring

TEG 100X: Corrosion Monitoring Technologies for Industrial Applications
Concept of Using Physics-Based Models for Real Time Corrosion Monitoring
Monitoring of Corrosion Rate and Evaluation of Deposited Sea Salt Distributed inside Steel Pipe for Transmission Leased at Coastal Environment
Permanently Installed Monitoring System for Accurate Wall Thickness and Corrosion Rate Measurement
A Biosensor for Sulfide Detection and Microbiologically Influenced Corrosion Monitoring
Monitoring of the continuous degradation of sulphur-containing, volatile organic compounds
Evaluation of the Real-Time Active Pipeline Integrity Detection (RAPID) System for Corrosion Quantification
Novel experimental technique for in-situ, real-time corrosion monitoring
Management of an open recirculating cooling water system using EN method in chemical plants
Corrosion Probe Metal Loss Rate Sensor Using a Mechanical Oscillator
Effect of Electrode Spacing of a Coupled Multielectrode Array Sensor on Corrosion Rate Monitoring

TEG 116X: Recent Experience with Austenitic and Duplex Stainless Steel
Corrosion Monitoring Of Assets Constructed In Super Duplex Stainless Steels (SDSS)
The Detection Of Alpha Prime In Duplex Stainless Steels
Marine Crevice Corrosion Of Stainless Steel Alloys Under Biofimled And Sterile Conditions
Recommendations on ASTM G31
Effect of Surface Finishes on the Atmospheric Corrosion of Duplex Grade UNS S32205: Results of a Field Exposure Program in Dubai
Understanding the Workability of 6Mo Stainless Steel in Recent Crushing Cases
Stress Corrosion Cracking Susceptibility of Stainless Steel 321 in Chloride – Hydrogen Sulfide Media
Hydrogen Sulfate Electrolyte Precipitation in Cast Superduplex Alloys
Effect of Chemistry and Heat Treatment on the Pitting Corrosion Resistance of Three Cast Duplex Stainless Steels
Behavior of Steels and Alloys in Concentrated Sulphuric Acid under Different Flow Regimes – New Perspectives
Potentiodynamic and H2S Corrosion Resistance of the New Formable Duplex Grades
Laboratory test to evaluate service life extension of ASTM A53 and A106 Type B pipe carcass at sour service
Achieving Success during Welding of Lean Duplex Stainless Steel Tubes to Carbon Steel Tubessheets

TEG 121X: Corrosion in Supercritical Systems
Corrosion Assessment of Pipeline Steels in Supercritical Carbon Dioxide Stream
A Leakage into the “annulus” of a CO2 Injection Well
The Corrosion of Carbon Steel in Supercritical and Subcritical CO2 with the presence of O2
Performance of Thermally Sprayed CRA Coatings on Carbon Steel in Supercritical CO2 Environments
Comparative corrosion behavior of X65, 1Cr and 5Cr Steels in Water-Containing Supercritical CO2 Environments with SO2/O2
Corrosion of Carbon Steel in Water Equilibrated with Liquid and Supercritical CO2
H2S Solubility in Dense Phase CO2 at Elevated Pressure: Impact on Materials Selection
Corrosion of Carbon Steel in Water Containing Sulfuric Acid
Corrosion of Carbon Steel in Geothermal Brines
Corrosion Testing in Gas-Separation Station at Hellisheidi Geothermal Power Plant in Iceland
Scaling and Corrosion Behavior of Metallic Materials after Long-term Exposure to the Geothermal Fluid of the North German Basin
Fatigue Behavior under Multiaxial Loading and Simulated Environment of Cr-Mn-N Austenitic Steel and UNS N07718
Performance on Cast Iron and Mild Steel Surfaces: Franger or Result of Electrochemical Corrosion
Advances in Corrosion Control in Combustion and Conversion
New Fe-Based Hardfacing Weld Overlay Alloys for Erosion and Wear Resistance in Coal-Fired Fluidized-
Corrosion Resistant Cast, Nickel Base Superalloys in Environments Relevant to Gas-Turbines Operating on Sulfur Rich Fuels
Effects of Corrosion Resistance of Ni- and Fe-based Alloys at 982°C
Corrosion of Metallic Materials in Oxidizing and Reducing Gases, Relevant to Oxygen Combustion
Effect of Chloride Content On the Corrosion Behavior of Ferritic and Austenitic Steels in Molten Solar Salts

http://corrosion2016.conferencespot.org/symposium-index
7747  Supercritical CO2 Compatibility of Structural Alloys at 400°-750°C
7756  TEG 18 SX: Environmentally Assisted Cracking
7757  Development of Carbon Steel for Pipe Resistant to Stress Corrosion Cracking in Fuel Grade Ethanol
7764  316L SS SCC Susceptibility of Duplex Stainless Steels in Boiling Solutions
7767  Impact of Microstructure on Hydrogen Solubility and Diffusivity in UNS 07718
7769  Investigation of the Stress Corrosion Cracking Behavior of Duplex and Lean Duplex Stainless Steel Parent and Weldment Materials in Sour Service
7770  TEG 18 RX: Localized Corrosion and Stress Corrosion Cracking of 2507 in H2S Containing Environments
7771  Influence of Baking Time At Different Temperatures On The Hydrogen Embrittlement Of Quenched And Tempered Martensitic (Qtm) Steel
7773  Hydrogen-Assisted Failure in Ni-Based Superalloy 718
7778  Effect of Crack Growth Rate in X70 Pipeline Steel in Weak Acid Solution
7780  Evaluation of Steel API X70 Embrittlement in Different Ethanol Environments
7781  Effect of Residual Stresses on Casing Sour Burst Pressure
7786  Mercury Liquid Metal Embrittlement of ASTM Grade 29 Titanium
7791  Predicting High Pressure High Temperature Testing Using Spring-Loaded Sustained Load Window-Box Fixtures
7792  Influence of localized corrosion on the fatigue behaviour of an austenitic stainless steel
7793  Effect of Iron Content on Corrosion Resistance of Ni-Cr-Mo Alloy Weld Overlays in Corrosive Environments
7794  Effect of Brine Ionic Strength on Sulphide Stress Corrosion Resistance of High Strength Low Alloy Stee
7795  Embrittlement Susceptibility of Stressed High Strength Ungrouted Post-Tensional Strands
7796  Using predicted corrosion damage to determine stress concentration, fracture and crack growth
7797  TEG 18 X: Microbially Influenced Corrosion
7798  Seawater Cooler Tubes: Corrosion And Leaks Due To Microbiologically Induced Corrosion
7799  Biocide Injection to Eliminate the Risk of Bacterial Growth and Corrosion Failure in Non Internal Coatings
7800  Monitoring and Risk Assessment of Microbiological Influenced Corrosion in Offshore Pipelines
7801  Enhanced Biocide Treatment of Corrosive Biofilms
7802  Surface behaviour of carbon steel in presence of sulphate-reducing bacteria
7803  Development of an Enzyme-Based Approach to Control the Formation of MIC
7804  Quadrifying the Risk of MIC
7805  Biocorrosion Mitigation Behavior of a Novel Cu-bearing Antibacterial 2095 Duplex Stainless Steel in Flowing Fluid Cell Loop (FFCL) System Design and FFCL-Based Corrosion Testing
7806  Effects of Water Hardness Precipitation on Erosion-Corrosion of “Lead-Free” Brass Fittings in Potable Water Systems
7807  Relative performance of two cast irons and two stainless steels under erosion-corrosion conditions
7808  Liquid Film Thickness and Erosion of Elbows in Gas-Liquid Annular Flow
7809  Predicting Erosion in Sudden Contraction and Expansion Geometries with Improved Near Wall Treatment
7810  Hydrogen Induced Cracking of A516 Plate Steels and the Apparent Effect of Microscopic Banding
7811  Evaluation of Various Phosphate Esters on High Temperature Corrosion control and Fouling Potential in Refining Systems
7812  Corrosion of Construction Steel in Monoethanolamine for CO2 Separation
7813  Corrosivity Study of Sulphur Compounds and Naphthenic Acids under Refinery Conditions
7814  Single versus Multiple Injection Points for REAC Wash Water Systems
7815  Corrosion Performance of API 5l X65 Steel in a Low Temperature Saline Environment Containing CO2
7816  Limitations of Common Oilfield Scale Inhibitor Chemistries
7817  Influence of Iron Oxide (rust) on the Performance of Phosphonates as Calcium Carbonate Inhibitors
7818  Barium Sulfate Crystal Growth and Inhibition: Implications of Molecular Structure on Scale Inhibition
7819  Insights on the impact of Fluid Cooling on High Temperature Conditions (175C) for Carbonate and Sulphate Systems
7820  New Developments in Iron Sulfide Scale Dissolvers
7821  Assessment of Formation Damage Potential of Corrosion Inhibitor Squeeze Applications
7822  Insights on the impact of Fluid Cooling on High Temperature Conditions (175C) for Carbonate and Sulfate Systems
7823  Modeling corrosion field-testing from the North Sea, experiences, benefits and pitfalls
7824  Effect of incorporation of Calcium into Iron Carbonate Protective Layers in CO2 Corrosion of Mild Steel
7825  Barium Sulfate Crystal Growth and Inhibition: Implications of Molecular Structure on Scale Inhibition
7826  Effect of Barium (rust) on the Performance of Phosphonates as Calcium Carbonate Inhibitors
7827  Limitations of Common Offshore Scale Inhibitor Chemic
7828  Corrosion Performance of API 5L X65 Steel in a Low Temperature Saline Environment Containing CO2
7829  Flow Assurance Risk Evaluation and Chemical Management in a Shale Gas Field
7830  Development of a Corrosion Model for Downhole Applications
7831  Application of a Downhole Corrosion Model
7832  Corrosion Control and Management of Corrosion and Scaling from Inland to Subsea Fields
7833  New Developments in Iron Sulfide Scale Dissolvers
7834  A Consistent Interpretation of Corrosion Test Results Using the Marcus Film Growth Model
7835  Development of a Corrosion Model for Downhole Applications
7836  Application of a Downhole Corrosion Model
7837  Corrosion Control and Management of Corrosion and Scaling from Inland to Subsea Fields
7838  New Developments in Iron Sulfide Scale Dissolvers
7839  Assessment of Formation Damage Potential of Corrosion Inhibitor Squeeze Applications
7840  Insights on the impact of Fluid Cooling on High Temperature Conditions (175C) for Carbonate and Sulfate Systems
7841  Modeling corrosion field-testing from the North Sea, experiences, benefits and pitfalls
7842  Effect of incorporation of Calcium into Iron Carbonate Protective Layers in CO2 Corrosion of Mild Steel
7843  Barium Sulfate Crystal Growth and Inhibition: Implications of Molecular Structure on Scale Inhibition
7844  Effect of Barium (rust) on the Performance of Phosphonates as Calcium Carbonate Inhibitors
7845  Limitations of Common Offshore Scale Inhibitor Chemic
7846  Corrosion Performance of API 5L X65 Steel in a Low Temperature Saline Environment Containing CO2
7847  Flow Assurance Risk Evaluation and Chemical Management in a Shale Gas Field
7848  Development of a Corrosion Model for Downhole Applications
7849  Considerations of Using Sodium Nitrite and Ammonium Bisulfite Solutions in Seawater Injection Facilities
7850  Iron Effects on Scale Inhibitor Performances for Laboratory and Field Operations
7851  A Stable Solution Chemistry System
7852  TEG 20 X: Refining Industry Corrosion
7853  Amine Corrosion in Gas Sweetening Plant: Causes and Minimization on Real Case Study
7854  Single versus Multiple Injection Points for REAC Wash Water Systems
7855  A New Method for Prioritizing Equipment in HTHA Service for Inspection and Replacement
7856  Assessment of Formation Damage Potential of Corrosion Inhibitor Squeeze Applications
7857  Insights on the impact of Fluid Cooling on High Temperature Conditions (175C) for Carbonate and Sulfate Systems
7858  Modeling corrosion field-testing from the North Sea, experiences, benefits and pitfalls
7859  Effect of incorporation of Calcium into Iron Carbonate Protective Layers in CO2 Corrosion of Mild Steel
7860  Barium Sulfate Crystal Growth and Inhibition: Implications of Molecular Structure on Scale Inhibition
7861  Effect of Barium (rust) on the Performance of Phosphonates as Calcium Carbonate Inhibitors
7862  Limitations of Common Offshore Scale Inhibitor Chemic
7863  Corrosion Performance of API 5L X65 Steel in a Low Temperature Saline Environment Containing CO2
7864  Flow Assurance Risk Evaluation and Chemical Management in a Shale Gas Field
7865  Development of a Corrosion Model for Downhole Applications
7866  Considerations of Using Sodium Nitrite and Ammonium Bisulfite Solutions in Seawater Injection Facilities
7867  Iron Effects on Scale Inhibitor Performances for Laboratory and Field Operations
7868  A Stable Solution Chemistry System
7869  TEG 20 X: Refining Industry Corrosion
7870  Amine Corrosion in Gas Sweetening Plant: Causes and Minimization on Real Case Study
7871  Single versus Multiple Injection Points for REAC Wash Water Systems
7872  A New Method for Prioritizing Equipment in HTHA Service for Inspection and Replacement
7873  Mechanism of High Temperature Corrosion by Model Napthenic Acids
7874  Corrosivity Study of Sulphur Compounds and Napthenic Acids under Refinery Conditions
7875  Troubleshooting Techniques to Identify the Source of Phantom Chlorides Found in Refineries
7876  Corrosion in Monoethanolamine for CO2 Separation
7877  Evaluation of Various Phosphate Esters on High Temperature Corrosion control and Fouling Potential in Refining Systems
7878  Hydrogen Induced Cracking of A516 Plate Steels and the Apparent Effect of Microscopic Banding
7879  A Corrosion Mapping Behind the Curtain of API 801 HTHA Data
7880  A Study of the Flow Effect on Napthenic Acid Corrosion of Mild Steel
7881  Corrosion Risks in Tail Gas Lines Going To Sour Recovery Unit Incinerators
7882  Corrosion of Prod Oil Containing Gas Oil: A Comparative Review
7883  Qualification of Integral Diained UNS S32205 Heat Exchanger Tubing for Retinery Wet H2S environments
7884  Improve Amine Unit Reliability and Optimise Treating
7885  TEG 213: Fluid Induced Degradation—Corrosion/Erosion and Their Interactions
7886  Effects of Corrosion of Carbon Steel Pipe Carrying Hot Condensate Water in a Chemical Plant
7887  Predicting Erosion in Sudden Contraction and Expansion Geometries with Improved Near Wall Treatment
7888  Exploring the Effect of Particles Impact Angle on Erosion-Corrosion Using Acoustic Emission
7889  Liquid Film Thickness and Erosion of Elbows in Gas-Liquid Annular Flow
7890  Determination of two stainless steels under erosion-corrosion conditions
7891  Effects of Water Hardness Precipitation on Erosion-Corrosion of “Lead-Free” Brass Fittings in Potable Water Systems
7892  Flowing Fluid Cell Loop (FFCL) System Desigen and FFCL-Based Corrosion Testing

http://corrosion2016.conferencespot.org/symposium-index
09.12.2016
TEG 224X: Corrosion in Nuclear Systems

7166 Corrosion of Nickel Alloys for Steam Generator Tubing of Pressurized Water Reactors
7227 A Study of Reactivation Process of Passivated Localized Corrosion of Carbon Steel in Radioactive Waste
7237 Corrosion Assessment of Nickel-based Alloy Candidates for SCWR Fuel Cladding
7247 Effect of High Temperature on the Crevice Corrosion of Monel 400 in Nuclear Service – Laboratory Measurements
7296 UNS N06055 High Chromium welding product provides resistance to PWSCC in service and to DDC and SOL
7421 Effects of Crevice on the Corrosion Behavior of Welding Joint in Simulated Groundwater
7542 Passivation Characteristics of Ferritic Stainless Materials in Simulated Reactor Environments
7591 Corrosion of Carbon Steel in Bentonite in Relation to the Swiss Deep Geological Repository
7592 Hydrodynamic Electrochemical Measurements of Aluminum Corrosion in Support of GSI-191
7592 Effect of pH Levels of Chloride on the Stress Corrosion Cracking of Pressure Vessel Steel
7654 Understanding the Risk of CISCC of Interim Storage Containers for the Dry Storage of Spent Nuclear Fuel: Residual stresses in typical welded containers
7654 Understanding the Risk of CISCC of Interim Storage Containers for the Dry Storage of Spent Nuclear Fuel: Evolution of Brine Chemistry on the Container Surface
7670 Degradation of Stainless Steel- and Aluminum-Based Neutron Absorbers Used in Spent Fuel Dry Storage
7695 Prospective Techniques for Monitoring Degradation in Passive SCCs for NPP SLR
7688 The Use of ASTM G192 to Evaluate the Susceptibility of Hanford Tank Steels to Pitting Corrosion
7705 Cathodic Protection System Upgrade Project at Catawba Nuclear Station
7764 Analysis of SCC Response of Alloy X-750
7767 Monitoring and Predicting Stress Corrosion Cracking of Long Term Spent Nuclear Fuel Storage
7779 Properties of Chemically-Aged High Density Polyethylene Pipeline Material Used in Nuclear Plants
7780 TEG 267X: Pipeline Integrity
7803 Methodology For The Evaluation Of Cleaning Pigs On Sludge Deposits From Corrosion Pits
7807 Internal Corrosion Direct Assessment Using Bayesian Networks Modeling With Limited Data-A Case Study
7819 Metallurgical Methods used to Assess the Significance of Pipeline Stress Cracking
7818 Remote Measurement of Stress in Carbon Steel Pipelines - Developments in Remote Magnetic Monitoring
7829 Validation of Internal Corrosion Threat Guidelines for Dry Natural Gas Pipelines
7836 Detailed Metal Loss Assessment of In-line Inspection (UT) Raw Data for Offshore Pipelines
7843 Risk Interference Risk Ranking: Case Study
7848 Hydrodynamic and Phase Wetting Criteria to Assess Corrosion Risk in Two-Phase Oil-Water Pipe Flows
7847 Developing the Next Generation of Pipeline Integrity Engineering Expertise
7853 Methodology for Threat Assessment and Mitigation Planning for Pipeline Integrity
7857 Development of New Methods to Evaluate the Performance of Offshore Pipelines
7857 Pipeline Assessment of Natural Gas Road Crossings Using Composite Repair
7857 Repair Prioritization Analysis for Cased Pipeline Crossings
7869 Case Study on Corrosion under Coating Sleeves after Strain Gauges Installed on Pipeline in Alberta
7877 Environmental Line Inspection and Direct Assessment Anomaly Density
7874 The ASME PCC-2 Standard Requirements for Training on Engineered Composite Repair Systems
7878 Improving Pipeline Operations: Boosting Component Performance and Longevity with Nanolaminated Alloy
7878 TEG 282X: Sour Corrosion
7875 Sour Localized Pitting Corrosion Model of Carbon Steel: A Status Update
7879 Effect of Elements Mo and W on Humidity Corrosion of Low Alloy Steels in H2S-Containing Environment
7890 Investigation of Cathodic Reaction Mechanisms of H2S Corrosion Using a Passive SS304 Rotating Cylinder Electrode
7906 OCP on Stress Corrosion Cracking of X70 Steel in Sour Humidity Corrosion Environment
7927 Electrochemistry of Iron Sulfide and its Galvanic Coupling to Carbon Steel in Sour Aqueous Solution
7927 The Role of Iron Sulfide Polymorphism in Localized Corrosion of Mild Steel
7945 Field Evaluation of H2S Scavenger Efficiency injected in subsea and topside systems
7963 Scaling investigation of API 5L X65 steel in a ‘sweet’ followed by ‘sour’ environment
7967 An Investigation into the Relevance of H2S:C2 Gas Ratios on The Corrosion Behavior of X65 Carbon Steel
7967 Corrosion Behavior of Ultra-high Strength Drilling Steel in Alkaline Brines Containing Hydrogen Sulfide at High Temperature
7967 Effect of CO2 and H2S on Corrosion of Martensitic Steels in NaCl(aq) at Low Temperature
7975 FES Nucleation on Oxide Free Mild Steel Surfaces
7983 Materials Selection and Corrosion Mitigation for Offshore Pipeline System
7983 TEG 288X: Control of Microbiocidal Microorganisms in Oil and Gas Field Operations
7983 The Impact of Monitoring Of Bacteria Under High Pressure And Temperature Conditions
7986 Investigation of the Effects of Nitrate and Nitrite and Halide Sulfate-Reducing Archaea (SRA)
7987 Methodology for the comparative evaluation of batch biocidal performance against microbial corrosion
7987 The Impact of Microbial Activity on Infrastructure Pipeline Corrosion
7990 Characteristic Corrosion Morphological Features Associated with MIC
7991 Premature Failure of Access Fittings on High Pressure Efluent Water Lines Due to Microbiologically
7997 enhanced THPS for Challenging Environments
7997 Lack of sulfur cycling and MIC in offshore water transporting pipelines
7997 Comparative Hydrothermal Stability of Biocides used in the Oil and Gas Industry
7997 Molecular Techniques for onsite monitoring of microbial populations in oilfields – Overview, Perspectives and Evaluation
7997 The Selection and Performance of Oil and Gas Biocides for Extended Microbial Control
7997 Biofilm:Probing: RNA sequencing of microbial pipeline corrosion in search for critical control points
7997 MIC Assessment Model for Upstream Production and Transport Facilities
7998 Understanding the role of microbes in frequent coiled tubing failures
7998 TEG 310X: Control of Biofouling on Biomedical Materials and Devices
7998 Bovine Serum Albumin Adsorption on AISI 316L And Ti Alloys in Phosphate Buffered Saline Solutions
7998 Electrochemical Corrosion Behavior of Niobium Alloys as Metallic Bio-Implants
7998 Electrochemical Study of Nb-10Ta-1Re and Ti-6Al-4V Alloys for Dental Implant Applications
7998 Electrochemical Evaluation of Advanced Titanium Alloys for Potential Biomedical Applications
7998 TEG 341X: Corrosion in Oil Sands
7998 Abrasion-Corrosion Resistance of Stainless and Wear Resistant Steels for Oil Sands Applications
7998 Abrasion and Wear of Cold and Make-up Water in Oil Sands Thermal Water Treatment Systems
7998 Application of Non-Metallic Materials in Oil Sands Operations
7998 Modeling and Prediction of Corrosion of Steel Tubular in SAGD/CO2 Co-Injection System
7998 Chemical and Electrochemical Prediction of Field Produced Pipe Failure in Oilands SAGD Facilities Using PEG-a
7998 Establishing Operating Envelops for Material Susceptibility to Environmentally Assisted Cracking in Thermal Oil Sands Operation
7998 Up to Tenfold Life Extension of Hydrotransport and Tailings Lines by Internal Coatings
7998 TEG 407X: Mechanisms of Localized Corrosion: In Memoriam of Professor J.R. Galves
7998 The Role of Local Chemistry Changes In the Repassivation Of Localized Corrosion – A Review
7998 Relation Between Localized Corrosion And SCC In Nickel Based Alloys In HP/HT Oil And Gas Environments
7998 The pitting corrosion of titanium in aggressive environments
7998 Corrosion Mechanism of API X80 Steel Material in Sour Environment at Different Temperatures
7998 Effect of Crevice Corrosion Resistance of Austenitic Stainless Steels
7998 Documented Evidence of Significant Metal Loss in Aluminum Crevice Corrosion
7998 Formation of Gallinaceous Cells and Localized Corrosion under Atmospheric Conditions
